WALTHAM. THE FUTURE OF PET NUTRITION HAPPENS HERE.™

WALTHAM is the world's leading authority on pet care and nutrition, operating research facilities around the globe. With a heritage of 60 years, WALTHAM is recognized for its wide ranging research, publishing more than any other pet food facility.

At present, WALTHAM is engaged in hundreds of studies at our worldwide research facilities and at dozens of universities all over the globe.

The end results of these studies are the exceptional foods that feed a third of the would's cats and dogs, helping to keep them healthy and happy, and helping them recover when they're ill.

These foods include world leading brands such as PEDIGREE® food for dogs and WHISKAS® food for cats, as well as WALTHAM® DIETS, AQUARIAN® food for fish, TRILL® food for birds, and WINERGY® food for horses. The reason for this success is our commitment, not only to the nutritional delivery of every recipe, but also to the use of high quality ingredients, leading to excellent palatability. And every recipe is tested to ensure that it meets standards that are amongst the highest in the industry.

At WALTHAM, the dedication of hundreds of scientists, veterinarians, animal behaviorists and pet nutritionists will ensure that future generations of pets get the care and nutrition they deserve.

WALTHAM. The future of pet nutrition happens here.™
