令和 5 年度 研究報告 (Bibliography)

長尾 毅

英文

1. Seismic Performance Assessment of Pile-Supported Wharfs: 2D Frame Analysis Method Considering Both Inertial and Kinematic Forces, C. Boyke, T. Nagao: Applied Sciences, 2023, 13, 3629; <https://doi.org/10.3390/app13063629>
2. Distribution of the Subgrade Reaction Modulus for Anchor Piles with Various Inclination Angles, T. Oda and T. Nagao, International Journal of GEOMATE, May 2023, Vol. 24, Issue 105, pp.1-10; <https://doi.org/10.21660/2023.105.3763>
3. The Impact of the Ground Irregular Sedimentary Structure on the Seismic Motion Amplification Characteristics: A case study in Tottori, Japan, T. Nagao and X. Ma, Engineering, Technology & Applied Science Research, Vol. 13, No. 3, 2023, 10834-10842; <https://doi.org/10.48084/etasr.5785>
4. Simplified Method for Nonlinear Seismic Response Analysis of Corroded Pile-Supported Wharf, A. N. Refani, T. Nagao, Applied Sciences, 2023, 13, 10936; <https://doi.org/10.3390/app131910936>
5. Subgrade Reaction Characteristics to the Anchor Pile of a Sheet Pile Quay Wall, K. Miyashita, T. Nagao, Engineering, Technology & Applied Science Research, Vol. 14, No. 1, 2024, 13082-13089; <https://doi.org/10.48084/etasr.6474>
